-Microsoft SQL	7/10	Spanish	(Beginner)
-R	6/10		
-C programming	5/10		
-Autocad	5/10		
-Revit	5/10		

Achievements

Being in the top %0.15 in University Entrance Exam of 2015

Ranked as 43th in ALES 2019-2' out of 120000

Winner of European Best Engineering Comp. (EBEC) of Bogazici 2018

Ranked as second in TUBITAK 2242 University Students Project Competition 2020

Experience

27.07.2021- ... / Business Analyst / DefineX Consulting

06.01.2020-02.02.2020 / Internship / Zetaş Eng. AS

9.08.2019-18.09.2019 /Internship / Dolsar Eng. Co.

2015-2016 / Student Represantative at Bogazici University

2013-2014 / Head of School Student Councel

About Me

   I'm a civil engineering alumnus from Bogazici University. In my undergraduate years, I got interested in data science. Therefore, I directed myself into this area and decided to do a Master's Degree in Industrial Engineering. In my senior year, our final project was the analysis and design of ship domain in the strait of Istanbul by using past Automatic Identification System (AIS) messages. There were nearly 8 billion messages stored in the MS SQL server. We cleared the data, analyzed it via MATLAB, and clustered the results with Phyton with my colleagues. I have studied the analysis part of the project.

   After graduation, I got accepted into the Industrial Engineering Master Program at Bogazici University and also I got into Marmara University Statistics Undergraduate Program in order to improve my statistic skills. At the same time, I started working as a business analyst at DefineX in the Digital Revenue Services (DRS) projects whose aim is to increase revenues of our customers (banks) on digital platforms. We take a few products like credit card or loan and we give an end-to-end consultancy to increase the quality of overall process on digital platforms like mobile apps or website. We find insights from their data to give recommendations about UX/UI design of application process and offering the products to right people at the right moment.

Clubs and Associations

TOG(Community Volunteers Foundation)

Çorbada Tuzun Olsun(CTO)*

Büyap
BOUN SIMURG Motorcycle Club
*CTO is an association which gives a cup of soup to the homeless every night by the help of voluntary people.

Hobbies & Personal Interests

Riding Motorcycle, Coding, Camping, Blockchain, Billiard, Playing Chess, Cooking, Ice Skating, Playing Kalimba, Drawing Graffiti
